Dear To Whom it May Concern:

I am writing to recommend Rubén Quispe Llacctarimay for his outstanding work at our 4 day hackathon during November 24 to 30th, 2020.

In less than 6 days he worked with a remote them to develop a functional application made for a beta test. He demonstrated an ability to coordinate with his teammates remotely and efficiently produced code with a commercial value.

Moreover his positive attitude helped him resolve issues quickly during the hackathon and dedication pushed him to the finish line of the event.

Our organization is highly satisfied with his overall performance and mental attitude. Based on our experience together, I can confidently recommend him for a position related to programming and/or team management.

Sincerely,
Hugo Cen Arteaga
Director of Hacking League
